

PRIVACY POLICY

Indux Group - Official Privacy Framework

1. Introduction

At Indux Group, we value your privacy and are committed to protecting the data of our users and their recipients. This Privacy Policy describes how we collect, handle, and secure information within our WhatsApp Messaging and Analytics platform. Our practices are designed to be transparent, ensuring that your business communication remains private and reliable.

2. Data Collection and Information Gathering

We only collect information that is essential for the effective delivery of our services. This includes:

- **Profile Information:** Basic details like your name, business email, and phone number provided during account creation.
- **Technical Credentials:** WhatsApp Business Account IDs and necessary access tokens required to connect your account with the Meta API.
- **Campaign Data:** Contact lists (phone numbers) uploaded by you via CSV files for the sole purpose of message distribution.

3. Use of Information and Messaging Flow

The information collected is used strictly to facilitate your messaging requirements:

- To process and send bulk WhatsApp messages as per your instructions.
- To track message status (Sent, Delivered, Read) and display them on your dashboard.
- To manage your wallet balance and ensure accurate billing for your campaigns.

4. Data Protection and Security Standards

We take the security of your data seriously. To ensure that your information is handled safely, we have implemented the following measures:

- **Secure Storage:** All uploaded contact lists and business credentials are stored in secure, serverless databases to prevent unauthorized access.
- **Authorized Access:** We use secure authentication methods to ensure that only you can access your account and campaign data.
- **Operational Safety:** Our system is built on a modern tech stack that prioritizes data integrity, ensuring that your information is processed without leaks or loss.

5. Information Sharing and Disclosure

Indux Group does not sell or rent your data to any third-party marketers. Information is only shared with entities directly involved in providing the service:

- **Meta Platforms:** Data is shared with Meta exclusively for routing and delivering messages through the official WhatsApp Business API.
- **Database Providers:** Secure infrastructure partners that host our encrypted database instances.

6. Cookies and Session Management

Our platform uses essential cookies to keep you logged in and to maintain the security of your session. These cookies help us understand how the platform is used so we can continue to improve the user experience without tracking your personal browsing habits outside of our system.

7. Compliance and User Responsibility

As a user of the Indux Group platform, you agree to comply with Meta's official messaging policies. It is your responsibility to ensure that all message recipients have given their consent to receive communications. We provide tools to help you manage these permissions and handle unsubscribe requests professionally.

8. User Rights and Data Control

You have full control over the data you upload. At any point, you can update your profile or delete your uploaded contact lists. Once you delete data from your dashboard, it is removed from our active processing systems to ensure your data sovereignty.

9. Financial Transparency and Payments

All wallet transactions are processed through secure payment gateways. We prioritize financial transparency, providing you with a full history of your recharges and message-wise deductions. Failed message costs are automatically credited back to your balance as per our refund policy.

10. Third-Party Integrations

Our platform integrates with the official Meta API. While we ensure our system is secure, your use of WhatsApp is also subject to Meta's own terms and privacy practices. We encourage users to review these third-party policies to stay fully informed.

11. Retention of Information

We store your campaign data and logs only for the duration required to provide you with analytics and history. If you decide to close your account, we follow a strict procedure to purge your business data from our records.

12. Updates to This Policy

We may update this Privacy Policy from time to time to reflect changes in our services or legal obligations. Any significant updates will be communicated through your user dashboard.

13. Contact and Support

If you have any questions regarding your privacy or our data handling practices, please feel free to reach out:
